

Parts for the Nutrimill

Hopper Lid #760237 Put it in place when milling for quieter operation.

Extender Ring #760236 This is nested in the flour bowl when it's shipped.

Milling Module

The grey knob in the back holds the milling module on the base.

Filter #760210

The round, black foam finishing filter fits into the lid. Keep it clean. It must be dry when you mill.

Bowl Lid #760225

The square inlet grommet (usually white) and the black rubber lid gasket are replacable.

Separator Cup #760260

This is a very important mechanical filter. It must be in place to separate the flour from the bypass air.

Flour Bowl #760220

The flour bowl slides into the mill.

Base Stand #760214

The milling module fastens onto the stand.
